## INTRODUCTION TO VEDIC MATHEMATICS

HTCS Education has been offering regular classes in Vedic Math for children since Spring 2016. This upcoming workshop is intended to give the parents and anyone interested an introduction to this topic. We are also seeking individuals who are interested in becoming teachers in Vedic Math. We will of course provide training for them.

**Date:** Saturday, July 8th 2017

**Time:** 2:00 pm – 4:00 pm

**Location:** HTCS Class/Conference Room

### What is Vedic Mathematics?

“Vedic Mathematics”, based on a book written by Sri Bharati Tirtha Maharaja, contains many useful techniques for fast mental arithmetic calculations. These techniques use the way the mind naturally works and are therefore a great help in directing the student to the appropriate method of solution. Find out more from this seminar, where a few of the Vedic Math techniques will be introduced.

### Why Vedic Mathematics?

“The simplicity of Vedic Mathematics means that calculations can be carried out mentally (though the methods can also be written down). There are many advantages in using a flexible, mental system. Students can invent their own methods; they are not limited to the one ‘correct’ method. This leads to more creative, interested and intelligent pupils”.

### Who can attend?

This seminar is targeted towards adults and youth (15 years and above).

Anyone who is curious about the subject matter is welcome.

Please bring a pencil and paper for hands-on exercises.

### About the presenter

Dr. Chandrasekharan Raman has been teaching Vedic Mathematics in NJ for the past 7 years. He taught Indian mathematics to school children in Chennai (India), while he was a college student. He is also currently learning advanced Sanskrit at HTCS Vidyalyaya.
